Paper No.

OFFICE OF PETITIONS

Notice of Non-Compliant Amendment (37 CFR 1.121)

The amendment document filed on //-03-03 is considered non-compliant because it has failed to meet the requirements of 37 CFR 1.121, as amended on June 30, 2003 (see 68 Fed. Reg. 38611, Jun. 30, 2003). In order for the amendment document to be compliant, correction of the following item(s) is required. Only the corrected section of the non-compliant amendment document must be resubmitted (in its entirety), e.g., the entire "Amendments to the claims" section of applicant's amendment document must be re-submitted. 37 CFR 1.121(h).

Application/Control Number: 09/833,609

Art Unit: 1775

DETAILED ACTION

Specification

- 1. The abstract of the disclosure is objected to because the abstract is not double spaced typed and is not in the form of a single paragraph. See MPEP § 608.01(b). Correction is required.
- 2. The disclosure is objected to because of the following informalities: The heading "Description Figures 1 to 4" should be changed to --Brief Description of the Drawings--.

Claim Objections

3. Claims 1, 7 and 8 are objected to because of the following informalities: Claim 1 is does not end with a period, and Claims 7 and 8 are each in the form of two sentences. Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 6. Claim 1, line 7, recites the limitation "double coated calcined composition modified barium titanate". This limitation makes the claims 1-16 indefinite because it is unclear if the limitation refers the coated barium titanate powder limitation recited in lines 2-4. Since it is unclear how these limitations are linked the claims are unclear.

Page 3

Application/Control Number: 09/833,609

Art Unit: 1775

7. Claim 1, line 6, recites the limitation "preferentially aligned". This limitation makes claims 1-16 indefinite because it is not known what alignment constitutes preferential alignment.

- 8. Claim 1, line 10, recites the limitation "dry and cut the green multilayer components". This makes the claims indefinite since the limitation "the green multilayer components" lacks antecedent basis in the claims.
- 9. Claim 1 recites both article and method limitations without linking the method limitations to the article. This makes claims 1-16 indefinite because it is unknown how the method limitations further limit the scope of the claims. For instance, is not clear that applicants are claiming that the article is manufactured by the claimed method steps.
- 10. Claims 1-16 refer to figures in the claims. This makes the claims indefinite because it is unclear how the figure limits the scope of each claim. The scope of protection being sought is unclear.
- 11. Claims 15 and 16 recite the limitation "such as". This limitation makes the claims indefinite because it is unclear if the limitations after "such as" are intended to limit the claim. The scope of protection being sought is unclear.

Discussion of the art

- 12. Since the scope of the claims can not be ascertained by the examiner, the following is a discussion of the closest prior art.
- 13. US Patent 6,268,054 (Costantino et al.) discloses a dielectric layers for multi-layer ceramic capacitors wherein the dielectric material is made up oxide coated barium titanate particles.

Application/Control Number: 09/833,609

Art Unit: 1775

14. US Patent 6,078,494 (Hansen) discloses a capacitor having a dielectric material made of

a calcined powder of doped barium-calcium-zirconium titanate with nickel or nickel alloy

electrodes.

15. JP411147716A (Kita et al.) discloses ceramic dielectric used in a ceramic capacitor made

with a barium titanate powder that is coated with titanium oxide.

Conclusion

16. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Stephen Stein whose telephone number is (703) 305-0583. The

examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m. If the

attempts to reach the examiner are unsuccessful, the examiner's supervisor, Deborah Jones can

be reached by dialing (703) 308-3822. Any inquiry of a general nature or relating to the status of

this application or proceeding should be directed to the Group Receptionist whose phone number

is (703) 308-0661. The fax phone number for this group is (703) 872-9310 for non-final

responses and (703) 872-9311 for after final responses.
